After that, its production was moved to Latin America. The company is named Volkswagen-Finanzierungs-Gesellschaft GmbH. But the Germans were forced to stop its production, as the model ceased to comply with strict European safety standards and the level of environmental pollution. In 1998, the Germans tried to revive the legend by introducing the Beetle II model - a front-wheel drive car, outwardly and in size reminiscent of the classic "Beetle". Built in a big way - around the factory premises was even laid a new city, called Wolfsburg (Wolfsburg). The project was approved by the Reich Chancellery, which allocated for its implementation the necessary amount of Reichsmark, provided that a working prototype will appear by the end of 1934. After the defeat of Germany in the Second World War, the Volkswagen factories retreated to the British. But the war that began, crossed out all plans and plants of Volkswagen, urgently switched to the production of military products of all-wheel drive amphibians KA4/Abelwagen, which were actively used by Wehrmacht troops. But these plans were not meant to come true - it took a long two years to implement the project. It seems that this car would be popular in Europe to this day. Belong to the Rolls-Royce, do not remove it, literally from under the nose, in 1998, BMW. The price for the new car was set at 990 Reichsmarks - less than the average worker received for the year. In 1937, the first VW30 appeared, already ready for mass production. According to legend, it all began in the autumn of 1933, when in an informal setting of the hotel room there was a meeting between Ferdinand Porsche and Adolf Hitler. One of Hitler's promises was to put behind the wheel all the German families. Porsche by that time had already become famous as an excellent designer, so it's no surprise that the solution to this problem was offered to him. The claims were put forward toughest, but the cars proved their suitability for transportation of representatives of the Aryan nation. Then they had already developed the general concepts of the new car. In 1949 Volkswagen returned to the Germans. A miniature and inexpensive car was an ideal solution for a war-ravaged country. It was decided to name the new brand "The People's Car" - "Volks-Wagen". The concern's factories are scattered in 15 countries around the world. In the future, in 1998 Volkswagen management officially recognizes this fact and starts paying compensation - 2050 people from all over the world were involved in this action. An important requirement was affordable value, which would be affordable for any self-respecting burgher. But the novelty did not even close to repeat the success of its predecessor (much better with the reincarnation of the classics it turned out at the company BMW with its new Mini). In those years in Germany everything was built this condition. For example, when creating merchant ships, already in the design phase, the goal was to provide an opportunity for easy conversion to an auxiliary cruiser. The first time Porsche was able to provide in January 1934. Workshop manual. What are only the models like Golf, Polo, Passat, Bora, Touareg, Tiguan ... At the factories of the company in those years they worked prisoners of war, forced to work. The seat of the Volkswagen Group, as mentioned above, is still in Wolfsburg. They carefully studied the "Beetle", but were not particularly interested. When the necessary prototypes were ready, the process of their thorough testing began. He started.
